TESTIMONIAL

To Whom It May Concern,

Our first contact with Dolphin Software was at the end of 2009.

Our initial need was to bring our small business into line with others by creating an easy to use website and order form for our delivery service.

We had approached a few other businesses with no luck and most seemed to think the web form we requested was not possible.

Dolphin software seemed to like the problem solving aspect of our needs and thought that nothing was impossible to achieve.

They have now completed both the web site and the order form and we continue to work with them monitoring any changes that need to be made as clients change and increase.

For a fairly new, small business trying to get ahead and gain the web exposure, that is so needed in these times, we have found the staff at Dolphin Software fantastic in helping us achieve our goals.

We hope to carry on working with them as our business expands.

Yours sincerely

Karen Dean & John Churly
